| Chemical Name                  | 2-((1H-Pyrrolo[2,3-b]pyridin-5-yl)oxy)-4-(4-((4'-chloro-5,5-dimethyl-3,4,5,6-tetrahydro-[1,1'-biphenyl]-2-yl)methyl)-2-oxopiperazin-1-yl)-N-((3-nitro-4-((tetrahydro-2H-pyran-4-yl)methyl)amino)phenyl)sulfonyl)benzamide                                                                                                                                                                                                                                                         |               |       |
| Structure                      | <p>The chemical structure is a complex organic molecule. It features a central piperazine ring fused with a pyrazine ring. The pyrazine ring is substituted with a 4-((4'-chloro-5,5-dimethyl-3,4,5,6-tetrahydro-[1,1'-biphenyl]-2-yl)methyl)-2-oxopiperazin-1-yl group. The piperazine ring is also substituted with a 3-nitro-4-((tetrahydro-2H-pyran-4-yl)methyl)amino)phenylsulfonyl group. The molecule is highly oxygenated, with multiple hydroxyl and methoxy groups.</p> |               |       |
| Batch No.                      | -                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | CAS No.       | NA    |
